Error in GUI!

Please open the browser console (F12), copy error text from there and create the issue on [github](#)  
Without this information it is not possible to analyse the error.  
It should looks like

Filename: \_jsxFileTime,  
lineNumber: 1464,

ConsoleSourcesNetworkPerformanceMemoryApplicationSecurityLighthouse

topFilterDefault levelsNo Issues

Translate: From npm  
Cannot find adapter name  
Cannot find adapter name

Uncaught TypeError: Cannot read property 'split' of undefined

The above error occurred in the <GitHubInstallDialog> component:  
  
at GitHubInstallDialog (http://localhost:3000/static/js/main.chunk.js:36864:3)  
at div  
at Grid (http://localhost:3000/static/js/vendors-main.chunk.js:73034:35)  
at WithStyles (http://localhost:3000/static/js/vendors-main.chunk.js:255639:31)  
at div (http://localhost:3000/static/js/vendors-main.chunk.js:81079:23)  
at WithStyles (http://localhost:3000/static/js/vendors-main.chunk.js:255639:31)  
at TabContainer (http://localhost:3000/static/js/main.chunk.js:25179:1)  
at WithStyles (http://localhost:3000/static/js/vendors-main.chunk.js:255639:31)

If in the second line you will see at :3000/static/js/main.chunk.js:36903 and not the normal file name,  
please try to reproduce an error with opened browser console. In this case the special "map" files will be loaded and the developers can see the real name of functions and files.
